# Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
- 6. Claims 7-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Okuno et al. ['309] in view of Iwaki et al. ['995]

Okuno et al., an applicant's cited prior art, disclose an image forming apparatus comprising a fixing device [Fig. 1] which includes a medium introducing port [opening on the left side shown in Fig. 1], a recording medium guide [5a] provided near the medium introducing port for guiding recording medium [Col. 4, line 65 to Col. 5, line 3]; and moving member [7] acts as stopper when the recording medium guide being turned to a position to close the medium introducing port [Col. 5, lines 4-20]. However, Okuno et al. does not disclose that the fixing device is detachable to a main body of the image forming apparatus.

Iwaki et al. disclose an image forming apparatus [Fig. 1] having a detachable fixing unit [Col. 4, lines 31-41].

It would have been obvious to one of ordinary skill in the art at the time the invention was made to have the fixing device disclosed by Okuno et al. being detachable as taught by Iwaki et al. for the purpose of improving the parts utilization efficiency when the serviceable life of a part of the fixing device ends.

#### Allowable Subject Matter

- Claims 1 and 6 would be allowable if rewritten or amended to overcome the objection(s) 7. set forth in this Office action.
- Claims 2-5 and 13-20 would be allowable if rewritten to overcome the objection(s) set 8. forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
